

RAJA AMPAT

WHERE ALL THE FISHES LIVE...

**PAPUA
DIVING**

More than 9.8 million hectares of land and sea encompass the Raja Ampat archipelago, in Indonesia's West Papua Province, off the North Western tip of the island of New Guinea.

1500 Islands and so many reefs that it would take more than a lifetime to explore...

DREAM IT. DO IT.

In 1998 Papua-Diving guided renowned Australian ichthyologist Dr. G. Allen on a few dives.

"Each dive was a mini-exploration," said Gerry.

"A light snapped on in my brain, and I thought: This is it."

**PAPUA
DIVING**

In 2001, Papua-Diving again guided Dr G. Allen at Cape Kri (our house reef) where he broke the world record for fish diversity, counting 283 different species of fish during one dive.

PAPUA
DIVING

“The richest reefs in the world.”

David Doubilet, National Geographic

PAPUA
DIVING

Raja Ampat,
where all the Mantas live!

PAPUA
DIVING

“This area has the most amazing landscapes I have ever seen”.
Roger Steene, author and underwater photographer with 40 years experience worldwide

'Eco' to us means working together with the local communities to build a better future.
Max Ammer

SORIDO BAY RESORT

PAPUA
DIVING

Sorido Bay Resort offers luxurious air-conditioned bungalows at the water's edge, with famous 'Cape Kri' as the house reef.

KRI-ECO RESORT

Kri Eco Resort offers authentic over-water cottages, a true Papuan experience.

A fellow diver moved to tears after his dive, sat dazed and dripping, muttering a mantra under his breath: "one million fish, one million fish, one million fish..." After Raja Ampat, diving will never be the same again. This is not just another new place to jot down in your dive log; it is diving's "Holy Grail".
